Santiago Velasco García

Mexico City, Mexico | +525530712407 | santiagovg2023@gmail.com | linkedin.com/in/VelascoSantiago | github.com/VelascoSantiago

Profile

Computer Engineering student (9th semester, UNAM) with a strong focus on **data engineering, workflow automation, and large-scale data analysis**, currently deepening my skills in distributed data processing. Interested in applying data and analytics to **high-impact problems across financial, technology, and consulting** environments. Eager to contribute hands-on technical experience to an innovative team focused on data-driven solutions and continuous improvement.

Education

National Autonomous University of Mexico | Faculty of Engineering | Computer Engineering | Expected July, 2027

Experience

DiDi Food | Mexico City, Mexico

Data & Process Optimization Lead Intern | October 2025 – Present

- Engineered **an API-driven automation framework** that **reduced campaign execution time from 76 to 35 hours**, enabling campaigns to go live ahead of peak order hours.
- **Analyzed, designed, and implemented end-to-end process improvements** to enhance operational efficiency across LATAM merchant acquisition and engagement initiatives as well as customer-facing campaigns.
- Created **ETL workflows** to seamlessly integrate commercial requirements into internal systems.
- Tracked and **analyzed the impact of process updates** to ensure strict alignment with business KPIs.

Data & Operations Execution Intern | June 2025 – October 2025

- Executed and supported the SME Engagement Commercial Offering, ensuring the accurate implementation of promotional campaigns within the platform.
- **Automated recurring operational workflows** to improve execution consistency and reduce manual workload.
- **Optimized complex SQL queries for large-scale sales and marketing datasets**, accelerating reporting and supporting daily operational execution.
- Managed and delivered data to Strategy & Planning, Operations & Execution, and Commercial stakeholders through **automated dashboards** to drive real-time, data-driven decision-making.

Projects

Energy Market ETL & Anomaly Detection Pipeline | CENACE Price Volatility Analysis

Built a modular **ETL and anomaly detection pipeline** that extracts hourly Local Marginal Prices from CENACE's API and flags price anomalies through a three-model consensus **(IQR, rolling Z-score, Isolation Forest)**, delivering **critical-alert dashboards**. Packaged as a reproducible CLI with unit tests and persistent logging. **[Documentation]**

Projects & Code Portfolio

Skills

Languages | **Spanish** *Native Speaker* • **English** *Highly proficient*
Programming Languages & Libraries | C • Python (Pandas, Scikit-Learn, Flask) • SQL (Oracle, Postgres, Spark)
Relevant tools & Skills | REST APIs • Docker • Jupyter Notebook • Git • Power BI • Excel

Certificates & Awards

Using Python to Access Web Data | University of Michigan | Coursera
Introduction to Data Science in Python | University of Michigan | Coursera
Scrum Fundamentals Certified | ScrumStudy
1st Place Winner: DiDi iYouth Development Program | DiDi Food (July 2026)
